

Care Instructions

Hanging Baskets & Patio Planters:

- **Light:** Place in a location with at least 5 hours of direct sunlight per day. Morning sun is OK
- **Watering:** When top of the soil is slightly dry to the touch, water well until it runs out the bottom of the basket or container
- **Fertilizing:** The soil is enriched with a slow release fertilizer. However, you may supplement this every two weeks with a balanced fertilizer such as our Flower and Veggie 10-15-19 fertilizer.
- **Maintenance:** As the flowers finish blooming, pinch them off to help promote new flowers and fuller growth
- **Temperature:** Place plants outside once temperature is above 10-15 degrees Celsius, and all danger of frost is gone

Strawberry Baskets:

- **Exposure:** Full sun. Water when basket feels light and the top of the soil is dry to the touch. Water thoroughly until water runs out the bottom. Fertilize once a week with a water soluble fertilizer such a Miracle Gro and supplement every 3 -4 weeks with our Flower and Veggie 10-15-19 granular fertilizer.
- The basket should produce fruit all summer and may have a short dormant stage and possibly produce once again in the late summer.

Herbs:

- The herbs may be planted directly into your garden or a large container. Place outside once temperatures are above 10-15 degrees Celsius and all danger of frost is past. Fertilize with a balanced fertilizer such as such as our Flower and Veggie 10-15-19 fertilizer. Water thoroughly when top of the soil is dry to the touch. Snip off the leaves and/or stems to use in your favorite dishes. Doing so will also promote more growth.

Veggies:

- Place in a sunny location. Tomatoes do not like rain on them, you can move them under cover or place them under a clear plastic "tent". Place outside once temperatures are above 10-15 degrees Celsius and all danger of frost is past. Water Fertilize with the same fertilizer as described above. Water thoroughly when top of the soil is dry to the touch.

Geraniums and Bedding plants:

- The geraniums may be planted directly into well drained soil or potted into a larger container. Once transplanted, water thoroughly. Same care instructions as above for the hanging baskets and planters.
